[First Nations propose changing Stanley Park's name to Xwayxway.](#)

What an interesting story about changing the name of Stanley Park to remove the colonialism. We now have Haida Gwaii and the Salish Sea. Removing colonial markers is about us as it is about the First Nations.

But I am thoroughly astonished, but sadly not surprised, at the degree of racism in the comments to this story. There are 16 comments now, only one in favour of the name change and many of those opposed spouting such racist bunk that it truly sours Canada Day.

More shame.
