The Ashley Madison hack is bad news for cheaters—and just as terrible for everyone else - By Harris O'Malley

It's like the royal family: glamorize them so we can bash them down to earth.

A bit of a mindfuck.

If Ashley Madison were a straight infidelity website among heterosexual couples in a world of simple heterosex, then yes, let's judge all these people. Because we love to judge.

But if you're interested to see what kind of other people use[d] Ashley Madison for arguably not so black-and-white sinful reasons, you may realize that quite a few people are getting hosed here.

But Harris O'Malley [said it better](#).

If you can read this piece and still remain steadfast in black-and-white judgement, then you should explain how that works for you in the comment section below.

As always, inane commentary is nuked. :)
